

HARIS ANEES

FULL-STACK DEVELOPER | PHP & LARAVEL | ASP.NET CORE | SECURITY-FOCUSED

+92 319 3699225 | harisanees74@gmail.com | Karachi, Pakistan

Portfolio: harisanees.netlify.app | GitHub: github.com/HarisAnees | LinkedIn: linkedin.com/in/haris-anees-0b9925285

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building secure, responsive, production-oriented web applications using PHP, Laravel, ASP.NET Core MVC, JavaScript, MySQL, SQL Server, REST APIs, and AJAX. Experienced in e-commerce, task management, social media management, authentication/2FA, travel, and fashion platforms. Security-focused with practical experience in authentication, RBAC, MFA/OTP, session management, password hashing, CSRF protection, XSS prevention, input validation, and secure database practices.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), AJAX, Bootstrap, Responsive Web Design

Backend: PHP, Laravel, ASP.NET Core MVC, REST APIs, PHPMailer

Databases: MySQL, SQL Server

Security: Authentication, Authorization, RBAC, MFA/OTP, bcrypt, Session Management, CSRF Protection, XSS Prevention, Input Validation

Tools: Git, GitHub, Postman, TinyMCE, Three.js

PROFESSIONAL EXPERIENCE

PHP Developer Intern — Internee.pk | Feb 2026 – Apr 2026

- Developed secure PHP/MySQL web applications implementing authentication, RBAC, CRUD workflows, AJAX interactions, and responsive interfaces.
- Strengthened application security through prepared statements, password hashing, CSRF protection, input validation, secure sessions, and access control.
- Integrated social-media REST APIs into a unified scheduling workflow and developed AJAX-driven application transactions using Git/GitHub.
- Debugged and maintained frontend, backend, database, and API workflows while developing production-oriented web application features.

Cybersecurity Intern — CodeAlpha | 1 October 2024 – 30 October 2024

- Developed practical security projects involving Network Intrusion Detection, network packet analysis, phishing awareness, and Python secure-code review.
- Applied cybersecurity concepts including network security, traffic analysis, intrusion detection, and secure coding.

SELECTED PROJECTS

Hush Heaven — Problem-Solving Project

Centralized fragmented Pakistan travel information through destination discovery, trip planning, budget estimation, safety guidance, personalized recommendations, maps, and travel essentials.

Hush Studio — Problem-Solving Project

Created a visual fashion discovery platform addressing the difficulty of finding organized styling guidance through categories, trends, style guidance, and interactive browsing.

E-commerce Webstore — Production-Ready

Built an online shopping workflow featuring product discovery, cart, wishlist, coupons, Payment checkout, invoicing, analytics, and responsive UI.

Task Management System — Production-Ready

Developed a role-based task platform supporting assignment, deadlines, progress tracking, notifications, reminders, and AJAX-powered status updates.

Secure Authentication & 2FA System — Production-Ready

Implemented secure account access using password hashing, Email OTP two-factor authentication, session controls, RBAC, CSRF protection, input validation, and prepared statements.

Social Media Management Platform — Production-Ready

Built a centralized workflow for content drafting, scheduling, media management, status tracking, analytics dashboards, and REST API integration.

EDUCATION

Bachelor of Cybersecurity — Dawood University of Engineering & Technology, Karachi | 2022–2026

Higher Diploma in Software Engineering — Aptech Pakistan | 2024–2027

CERTIFICATIONS & ACHIEVEMENTS

Google IT Support Professional Certificate • Microsoft Cybersecurity Analyst Professional Certificate • Google Prompting Essentials Specialization
